|-----------------------------------------------------------------------------------------|------------|
| <b>Instead of preface</b>                                                               | <b>4</b>   |
| <b>Introduction</b>                                                                     | <b>5</b>   |
| <b>Part 1. Plastron of Jerusalem</b>                                                    |            |
| <b>High priest is a quantum device of information interactions with physics reality</b> | <b>7</b>   |
| 1.1. Geometrically active structure of plastron                                         | 9          |
| 1.2. Main processes in «plastron-physics reality» system                                | 17         |
| <b>Part 2. System: «Quanting observer – quantum device – quanted world»</b>             | <b>24</b>  |
| 2.1. System: «quanting observer ... –... quanted world»                                 | 24         |
| 2.2. Quanted mechanism of holographic brain model                                       | 35         |
| <b>Part 3. Creative quantum technologies for objective reality management</b>           | <b>71</b>  |
| <b>Notes of « ... observer ...»</b>                                                     | <b>82</b>  |
| <b>Literature</b>                                                                       | <b>87</b>  |
| <b>Conclusion</b>                                                                       | <b>100</b> |
| <b>Instead of epilogue</b>                                                              | <b>101</b> |
